Forecast for Sunday 30 Jan 2022

Weather: Dry early morning with some bright spells. Cloud thickening from the west from mid-morning, to bring patchy rain from around mid-afternoon, falling as snow above level 600-700m, which turns heavy and persistent for a time late afternoon and early evening, before clearing to blustery showers from around mid-evening.

Chance of cloud-free hill tops above 800m: 85% becoming 10% or less late afternoon.

Low cloud and visibility: Good or very good becoming moderate or poor in rain, also briefly in later showers, very poor in snow and only a few metres in cloud with bases quite extensive in rain from 500m, sporadically so in showers later.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Difficult to hazardous conditions later with potentially storm force summit winds and hill fog.

Forecast for Monday 31 Jan 2022

Weather: Isolated showers and brighter spells at first, then cloud thickening from the west during the afternoon, bringing periods of rain for the evening. Snow level around 600m throughout.

Maximum wind: West or northwest beginning mean 45-50mph with gusts to 70mph possible across most exposed ridges and summits, gradually decreasing through the day.

Chance of cloud-free hill tops above 800m: 85% becoming 10% or less late afternoon

Low cloud and visibility: Good or very good becoming moderate or poor in showers and later rain, very poor in snow and only a few metres in cloud with bases infrequently lowering 500m in showers, becoming widespread in later rain.

Temperature: **Valleys:** Plus 1 Celsius increasing 7 Celsius during the afternoon
At 800m: Minus 2 to Zero Celsius
Freezing level: 600-800m later
